CONform™

Flexible Concrete Forming Solutions

CONform is a reusable, flexible concrete form that can be used in place of conventional forms. CONform is made from polyolefins, a type of flexible plastic that gives you the ability to create bends and curves in a fraction of the time it takes using wooden forms.

Its durability will allow for 100's of installations from a single roll, without the use of any form release agent, saving you time and money. Once the concrete is set, the 50-foot form strips away clean and can be recoiled for easy storage.

Why CONform™?

Cost (labor) saving

- ✓ Quick setup
- ✓ Easy cleanup with no form release agents required
- ✓ Quick removal and easy storage

Ability to reuse multiple times

- ✓ Lower per-use costs
- ✓ Lower job refuse costs
- ✓ Less Waste

Clean lines eliminate rework

- ✓ No sticking
- ✓ No feathering
- ✓ Less blowout

Environmentally friendly

- ✓ Manufactured from recycled plastic
- ✓ Recyclable (if ever necessary)

Being on the right path with **CONform** saves you:

- ✓ Labor Costs
- ✓ Clean-Up Costs
- ✓ Material Costs
- ✓ Installation Costs

EZ-TAP™ Recycled Synthetic Nailer Board for Synthetic Turf

Making Turf Installation Faster, Easier & Safer

2" x 2" Synthetic Turf Nailer Board with New V-Shaped Face

Features & Benefits

- Easier & faster to center Tapcon
- Reduce drill slippage & injuries
- Made in the USA with 98% recycled plastic
- Sized right, so no ripping required
- Flexible for curved edges
- 2" x 2" nominal size
- Grooved surface makes it easier to secure turf with screws or staples
- Superior screw, staple & nail retention
- High strength & durability
- Will not rot or decay
- No splinters or cracking
- Water resistant
- Impervious to insects
- Sustainable & environmentally friendly
- 15-year limited warranty

Recycled Plastic Lumber Nailer Board

Plastic Lumber in Synthetic Turf Installation

A Better Solution

BestPLUS nailer boards for synthetic grass installation offer the perfect combination of strength, stability, durability, and sustainability.

Why BestPLUS?

Unlike wood, our recycled plastic material system offers unmatched fastener retention and is resistant to moisture and chemicals.

With a similar expansion and contraction rate to nylon, our blend of HDPE plastic will reduce the long term stress on turf, extending the life for your product.

Features & Benefits

- Made in the USA with recycled HDPE plastic
- Sustainable & environmentally friendly
- Flexible material contours to unique designs
- Compatible with common woodworking tools
- High strength & durability
- Will not rot or decay
- Nonporous surface will not harbor bacteria from animal waste
- Waterproof
- Impervious to insects
- No splinters or cracking
- No sealants required

COMPANY HISTORY & VALUES

Triumvirate Environmental, Inc.

Since 1988, Triumvirate Environmental Inc. has been providing waste management, field services, and technical services to healthcare, education, life sciences, and other markets. Our goal is to help our clients reduce waste, save money, stay safe and compliant, and build green and sustainable solutions.

Best Plastic Lumber US (BestPLUS)

Created out of the desire to improve our lives, communities, and planet, Triumvirate Environmental launched Best Plastic Lumber US (BestPLUS) as a way to divert large volumes of plastic from waste streams. BestPLUS, a sustainable plastic lumber manufacturer, provides durable, low-maintenance lumber to many industries. We manufacture utility-grade lumber from recycled plastic for use in various markets – transportation, construction, landscaping, marine, industrial, HVAC, agriculture, decking, military, recreation, etc.

Recycling and Extrusion Processes

Triumvirate Environmental works closely with customers to determine the best means for managing their waste with an eye toward more sustainable solutions, such as waste minimization and recycling. Triumvirate Environmental transfers large volumes of waste into our BestPLUS facility in Jeannette, PA where it is cleaned, sorted, and converted to a resin.

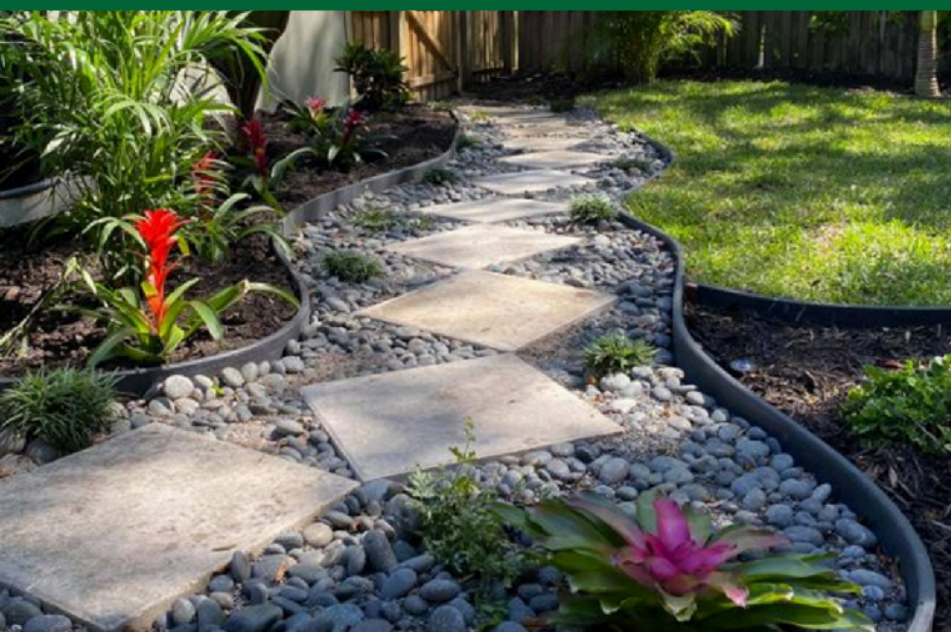

That resin is then mixed with colorants and additives, melted, and extruded into one of our many profiles. The nailer board end product is a durable and cost-effective alternative to conventional building materials that is ideal for synthetic grass installations.

Recycled Plastic Lumber Flexible Edging Kit

BestPLUS Plastic Lumber, a sustainable plastic lumber manufacturer, provides durable, maintenance-free lumber that can be used in a variety of commercial, industrial, and residential applications as a replacement for steel and aluminum edging. Our product is suitable for all edging applications.

Our recycled plastic lumber flexible edging kit includes 1" x 4" x 30' flexible edging, easy-to-follow instructions, 26 screws, a screw bit, and 12 stakes!

Features & Benefits of Recycled Plastic Lumber

- ✓ Proudly made in the USA with recycled plastic
- ✓ High strength & durability
- ✓ Nonporous surface will not absorb moisture
- ✓ Impervious to insects
- ✓ Long-lasting
- ✓ Will not rot or decay
- ✓ Resusable
- ✓ Maintenance-free
- ✓ Compatible with common woodworking tools
- ✓ Safer & easier to handle
- ✓ Flexible material contours to unique designs
- ✓ No sealants required
- ✓ Will not lose finish or rust
- ✓ Waterproof
- ✓ Environmentally friendly & sustainable

Recycled Plastic Lumber

TRUCK & TRAILER MARKET

APPLICATIONS:

- ✓ Scuff Boards
- ✓ Trailer Liners
- ✓ Rub Rails
- ✓ Front Boards
- ✓ Tie Downs
- ✓ Dunnage
- ✓ Cap/Bang Boards
- ✓ Stringer/Frame Rail Slats
- ✓ Trailer Decking Nailer Boards
- ✓ Flooring/decking
- ✓ Sleeper Boards
- ✓ New and after-market uses

FEATURES & BENEFITS:

- ✓ Made in the USA with recycled HDPE plastic
- ✓ Sustainable & environmentally friendly
- ✓ High strength & durability
- ✓ UV-stabilized
- ✓ Will not rot or decay
- ✓ Waterproof
- ✓ Resistant to chemicals, road salts, caustic oils & acids
- ✓ Impervious to insects
- ✓ Maintenance-free
- ✓ No painting or staining
- ✓ No splinters or cracking
- ✓ Stable pricing and supply

PRODUCT PROFILES:

- 1 x 3
- 1 x 6
- 1 x 12
- 1 x 18
- 1 x 24
- 2 x 4

Other sizes also available!

PRODUCT GRADES:

Utility – Industrial grade. High impact resistance.

Structural – Fiberglass reinforced.

Best Plastic Lumber U.S. (BestPLUS), a sustainable plastic lumber manufacturer, provides durable, low-maintenance lumber to a range of industries. We manufacture utility-grade lumber from recycled plastic for use in various application within the transportation industry. Drop shipping and private label programs available.

TRUCK & TRAILER APPLICATIONS

SCUFF BOARDS:

Recycled plastic scuff boards in the sizes 6", 12", 18" and 24". Available in black, white or specialty colors. Packaged flat or coiled.

CAP BOARDS:

Recycled plastic cap boards (bumper boards) manufactured in both recycled plastic and fiberglass-reinforced plastic. Protect your box and keep your trailer looking great.

Boards are colored to hide scratches and chips.

STRINGER/FRAME RAIL SLATS:

Recycled plastic rail slats provide manufacturers and end users with a consistent material source. Slats resist moisture, reducing repairs and the need to readjust connector bolts.

TIE DOWN/RUB RAILS:

Recycled plastic rails provide a cost effective alternative to wood and metal products. Also available in one continuous length, adding to ease of installation.
